FF Trapped by Interior Collapse

Background: A crew member has been trapped by debris from a interior ceiling collapse. The ff's crew has called the MAYDAY and is attempting to rescue the ff from the debris pile. The fire is not under control yet and the member is approx. 100' away from your staging area. Discuss this scenario as a RIT crew and select the best possible alternative or create another solution according to your department procedures.

Consider Tools Combine Options Identify Safety Considerations

Scenario #1	Scenario #2	Scenario #3
RIT will await orders from interior crews who are attempting rescue and support their operation as needed.	RIT will enter the structure with rescue equipment and spare air and take-over or support the on-going rescue effort.	RIT will rapidly open any available entry/exit points nearest the rescue effort to allow for quick removal of downed ff.
