

## Drill created by Lance Peeples

### Scenario:

Your company has been dispatched to a reported “child’s hand caught in a meat grinder”. Upon arrival you find a small child with his hand trapped in a meat grinder.

1. Using only the tools available on your apparatus describe your plan of action.
2. Discuss the medical management of the child.
3. What hospital should the child be transported to?
4. What safety precautions should be taken?
