## ONE MAN LADDER DRAG – Robby Owens

Here is an easy way to efficiently and effectively move multiple ladders and tools with one firefighter. Your only limitation is your imagination.

*Size up the building and objective. Select the appropriate ladders and tools.*

Open the hooks on the roof ladder and place the roof ladder on top of the extension ladder in order to hook it to the extension ladder. Then place your tool of choice on top of the roof ladder. Other tools may be placed on the ladders as well (i.e. chainsaw, irons, etc.).

Grab the rungs and Go!  
Remember...Two Hands, Two Tools!

**Do not let your fire ground slow you down!**
